FOREWORD

FOREWORD

The Ontario Ministry of Tourism and Recreation commissioned this study in order to determine the travel habits and characteristics of non-residents of Ontario travelling within the province. Travel by residents of Ontario is excluded. This information will be of assistance for the preparation of both marketing and developmental programs for this Travel Association Region in addition to general economic planning.

Travel data for this regional profile cover the following: origin of travellers, length of stay, seasonality, mode of transportation, purpose of trip, accommodation used, activity participation, tourism advertising, expenditures and socio-economic characteristics.

This calendar year 1985 study, which was conducted by Traveldata International, involved about 10,590 interviews of non-Ontario residents as they exited the province by highway, air and train. Full details on survey methodology are contained in the Technical Appendix which is available under separate documentation.

For any further queries in regards to the methodology employed or to this publication, please contact:

Tourism Research Section
Ontario Ministry of Tourism and Recreation
77 Bloor Street West
TORONTO, Ontario

(Telephone: 416-965-5725)

NOTE: This report contains a separate analysis for the following mode/origin groupings:

- Total (All Origins, All Modes)
- U.S. Origin, Highway Mode.

Due to the small sample size in this region, the following mode/origin groupings will not be shown:

- U.S. Origin, Air Mode;
- Canadian Origin, All Modes; and
- Other Countries Origin, All Modes.

HIGHLIGHTS
TAR 5: CENTRAL ONTARIO

HIGHLIGHTS
TAR 5: CENTRAL ONTARIO

Visitation/Trip Characteristics

A total of 561,000 travellers visited Central Ontario (TAR 5) during 1985, or about 2 percent of the total number of travellers to Ontario. Almost all travellers to the region (96%) were overnight visitors.

Of the 537,000 overnight visitors, 40 percent were from the United States, while 57 percent came from other Canadian provinces. Ouebec was the origin of 29 percent of the overnight visitors, the Maritimes 14 percent.

Three-quarters (76%) of overnight visitors to the region came between April and September, with the bulk (57%) visiting during the July to September summer season.

A very large proportion of travellers (61%) came to the region to visit friends and relatives, while 28 percent came for recreation and pleasure purposes. Among those who were from the United States and travelled by highway, the proportion visiting friends and relatives is lower (36%) and those travelling for recreation and pleasure increases to 54 percent.

Some of the more popular activities include visiting friends and relatives, shopping, eating in a restaurant, sightseeing, and outdoor/ sporting activities. Also, 19 percent went to historical sites and 18 percent to attractions/zoos/amusement parks. Visitors to this region

tend to partake in more activities than in the province in general. Possibly this is due to the large proportion of overnight visitors who have more time on their hands.

The 537,000 visitors who stayed overnight spent a total of 2.725 million nights in the region, or an average of 5.08 nights. Those two and three-quarter million nights represent 6.2 percent of the total nights spent by visitors in Ontario. Of those approximately two and three-quarter million nights, nearly two-thirds (63%) were spent with friends and relatives. Another 12 percent of the nights were spent camping.

Among the United States residents who travelled by highway, a smaller proportion of the nights (29%) were spent with friends and relatives, 25 percent were at private cottages, and 18 percent were spent camping.

Trip Expenditures

A total of $56.16 million (Canadian) was spent by travellers in the region, 3 percent of all the expenditures by travellers in Ontario. Ninety-seven percent of the expenditures were contributed by overnight visitors. Canadians accounted for 47 percent of the expenditures, Americans 45 percent. Fully one-quarter of the expenditures came from Quebec residents.

Americans had a higher average expenditure ($106.97) than Canadians ($85.41). Overnight visitors had an average expenditure per trip of $95.06. The overall regional average was $94.46.

The travellers spent most of their money on automobile expenses (26%), food and beverage (25%), accommodation (24%), and other items (16%). Only 5 percent of all expenditures were pre-paid, which was lower than the provincial average of 9 percent.

Socio-Economic Characteristics of Travellers

Of the travellers to the region, approximately 1 in 4 was under 19 years, 1 in 5 was 20 to 34 years of age, 3 in 10 were 35 to 54 years of age, and 1 in 5 was over 55 years. Approximately one-third had high school as their highest education level, while another third had a university degree.

Nearly one-quarter of visitors came from a household where the income was under $30,000, 2 in 5 were between $30,000 and $60,000, and 1 in 5 was over $60,000. Eighteen percent refused to give their income.

Approximately one-third come from a household where the chief wage earner was a professional/executive/owner/manager, and 3 in 10 were skilled labourers. Another 2 in 10 work in a sales or clerical function.

Summary

In general, this region has a fairly even mixture of United States and Canadian visitors. Nearly all travellers are overnight visitors, and close to a third of these come from Quebec.

The region receives 2.1 percent of the travellers to the province, but manages to pull in a slightly larger proportion (2.5%) of their dollars. This can mainly be attributed to the high proportion of overnight visitors.

DETAILED FINDINGS

SECTION I
TRIP CHARACTERISTICS

TAR 5: CENTRAL ONTARIO

Table 1: Origin of Overnight Visitors[3]

Origin	Destination: Region (1) #	Region (1) %	Province (2) #	Province (2) %
USA	215	40.0	5,313	58.6
Michigan	28	5.1	1,321	14.5

Alberta	31	5.8	223	2.5
British Columbia	7	1.3	217	2.4
Others	9	1.7	30	0.3
All Other Countries	16	3.0	398	4.4
United Kingdom	5	0.9	106	1.2
Total (Base) ('000):	537 Person Visits	100.0	9,100 Person Trips	100.0
Average Party Size Per Trip:	1.96			

(1) Based on Person Visits to the Region (Region in which an overnight visit was made -- note that in deriving the actual number of overnight visitors to a given travel Region, Person Visits were counted only once if there were overnight stops in more than one place **within** the given Region).

(2) Note that two measures of overnight travel are employed, namely Person Visits and Person Trips. The former gives an accurate count of visitation to any given Region within the province, whereas the latter, which is on a main destination basis, is not precise as it does not reflect visitation which may have been made to different Regions on the same trip. Therefore, the grand total of Person Trips/Person Visits for all Regions combined does not reflect a correct provincial total. Only the sum of same day and overnight Person Trips for all Regions combined can be used as the total for Ontario.

(3) Data on same day visitors unavailable due to small sample size.

TAR 5: CENTRAL ONTARIO

Table 2: Length of Stay

Length of Stay	Destination			
	Region(1)		Province(2)	
	#	%	#	%
Day visitors	24	4.3	16,042	63.8

United Kingdom	634	1.1	50,641	2.3

(1) Based on Households with any expenditure, in current dollars.

(2) Note that total expenditure **excludes** those made by visitors leaving the province by bus, boat and other miscellaneous modes of transportation. Official **total** expenditure by American and other country visitors in Ontario is provided by Statistics Canada. Total spending by residents of other Canadian provinces in Ontario is derived from the Canadian Travel Survey conducted by Tourism Canada.

TAR 5: CENTRAL ONTARIO

Table 2: Average Expenditure By Origin and Destination Region (Current$)[1]

Origin of Travellers to Region[3]	Average Expenditure Per Traveller Per Trip (2)	Destination Region	Average Expenditure Per Traveller Per Trip (2)
USA	$106.97	TAR 1:Southwestern Ontario	$37.32
		TAR 2:Niagara and Midwestern Ontario	38.58
Canada	$85.41	TAR 3:Grey-Bruce-Huronia-Muskoka	128.81
		TAR 4:Metropolitan Toronto	203.74
		TAR 5:Central Ontario	94.46
		TAR 6:Eastern Ontario	51.30
		TAR 7-12:Northern Ontario	109.39
		TROR 1:Southwest Ontario	40.28

		TROR 4:Northeast Ontario	91.74
		TROR 5:Northwest Ontario	104.56
Regional Average	$94.46		

(1) The method used to calculate the average expenditure was as follows: a traveller (denominator) was counted in each and every Region of the province that was visited at all during the trip (without any duplications) -- the expenditure (numerator) was allocated to a given Region according to a prescribed set of rules (see Technical Appendix).

(2) Any length of stay.

(3) Average expenditure is only shown for those origin groupings, where the calculation of said average expenditure is based on a sample size of over 100 households.

TAR 5: CENTRAL ONTARIO

Table 3: Itemized Expenditure (Current $)

Item	Expenditures In: Region $	Region %	Province $	Province %
Total ('000)	56,156	100.0	2,223,876	100.0

Minnesota	-	-	203	4.3
Wisconsin	4	1.8	120	2.5
Indiana	6	2.8	107	2.2
Other USA	55	27.6	918	19.2
Total (Base) ('000):	198 Person Visits	100.0	4,773 Person Trips	100.0
Average Party Size Per Trip:	1.98			

(1) Based on Person Visits to the Region (Region in which an overnight visit was made -- note that in deriving the actual number of overnight visitors to a given travel region, Person Visits were counted only once if there were overnight stops in more than one place **within** the given Region).

(2) Note that two measures of overnight travel are employed, namely Person Visits and Person Trips. The former gives an accurate count of visitation to any given Region within the province, whereas the latter, which is on a main destination basis, is not precise as it does not reflect visitation which may have been made to different Regions on the same trip. Therefore, the grand total of Person Trips/Person Visits for all Regions combined does not reflect a correct provincial total. Only the sum of same day and overnight person trips for all Regions combined can be used as the total for Ontario.

(3) Data on same day visitors unavailable due to small sample size.

APPENDIX I
STUDY DESIGN SUMMARY

STUDY DESIGN SUMMARY

1. Background

The 1985 Ontario Exit Survey was commissioned by the Province of Ontario to provide up-to-date information on non-resident visitors to the province.

The study complements the Ontario Travel Survey, a survey of Ontario resident travel, conducted in 1982 and updated in 1985.

2. Objectives

The 1985 Ontario Exit Survey was designed to meet the following broad objectives:

- to measure the volume and value of tourism to the province and to its tourist regions;
- to obtain detailed information regarding trip and traveller characteristics;
- to measure visitor awareness of Ontario destination advertising.

The information will be of assistance for the preparation of both marketing and development programs in the Ontario travel industry, in addition to general economic planning.

3. Design Summary

(a) Study Method

The study involved interviewing non-resident visitors as they left the province at:

- provincial and international highway exits;
- airports on out-of-province flights, both scheduled and charter;
- trains leaving the province.

Excluded from the study were those leaving the province by bus or boat.

(b) Time Frame

The study was conducted for a full twelve months, from January 19th, 1985, through to February 25th, 1986.

Specific locations of interviews and dates are included in the Technical Report.

(c) Interviewing Procedure

Non-resident visitors were interviewed at exit points and surveyed in person by trained interviewers.

Highway surveying was carried out at U.S. border crossings, major provincial border locations, and at Ottawa bridges. The survey firm, Traveldata International, worked closely with the Ministry of Transportation and Communication in designing safe and effective inter-provincial highway interviewing procedures.

Airport interviewing was carried out in the departure lounges of outbound flights, train interviews onboard trains leaving the province.

The procedures are described in full detail in Section C of the Technical Report.

Copies of the questionnaires are appended to this report for reference.

(d) Sample Design

The sample is, technically, a multi-stage stratified probability sample. The different stages or levels of sampling ensure a representative sample. A systematic sampling procedure ensured a spread of stints over the full 12 months. At each stage, quotas were established for each of several alternatives, or systematic sampling was employed so that the final sample included:

- each quarter of the year properly covered;

- all types of non-commercial vehicles, both chartered and scheduled aircraft, and a representative sampling of trains;
- a spread of different ports within each mode;
- both weekdays and weekends;
- different times of day;
- a spread of dates within each season;
- a random sample of eligible exiting visitors.

In fact, two separate samples were drawn, each replicating the other. This permitted determination of the reliability or accuracy of the data.

The procedures used at each stage of sampling were carefully controlled and rigorously followed. The results were subsequently computer weighted to reflect the probabilities of selection and to generate visitor projections.

Sampling was carried out during daylight hours at highway locations. To account for nighttime traffic, a special observation and counting procedure was set up to estimate the number of non-resident visitors leaving the province during hours of darkness.

(e) Interview Completions

The following number of personal interviews were completed:

- Quarter One: 1,164 interviews
- Quarter Two: 3,904 interviews
- Quarter Three: 4,154 interviews
- Quarter Four: 1,368 interviews
- TOTAL: 10,590 interviews.

Results

The findings of the study are presented in the following volumes:

A. Analysis:
- Volume I -- Ontario

Not stated	0.7	1.3
Base ('000):	13,838 Person Trips	9,536 Person Visits

(1) Among those aged 15 and over.

APPENDIX III
DEFINITIONS

A. MEASUREMENT OF HOUSEHOLD TRAVEL

1. Visitor

Any person visiting the Province of Ontario and whose permanent place of residence lies outside the province. Excluded were individuals travelling for the following purposes:

- commuting to school or work;
- an operator or crew member of commercial carriers, including trucks;
- for sales calls or deliveries;
- moving to a new residence.

If an individual re-entered the province several times on one trip away from home, that individual was eligible for interview only at the last exit from the province. The study, then, is a survey of **visitors** rather than **visits**.

2. Travel Party

Defined as comprising all those persons travelling together and participating in the same activities. In many cases, travel parties consist of members from more than one household.

3. **Household Party**

Defined as members of the same household travelling together. This is the basic unit of analysis for the survey.

4. **Household Trip**

A trip involving one person or a group of persons from the same household. For example, if four persons from one household travel together, it counts as one household trip. If they all belong to different households, it counts as four household trips.

5. **Person Trip**

A trip taken by one person, either singly or in a group. If four persons go on a trip together, it counts as four person trips.

6. **Person Night**

A night spent by a person on a trip. For example, if two persons take a trip involving three nights away from home, there is a count of six person nights.

7. **Person Visit***

A person trip which is counted more than once if there is an overnight stop in more than one area of the province. For example, if two persons stop overnight in one area and then stop in another area, there is a count of four person visits.

* During the survey, two methods were used to ascertain the destination of each trip. The respondent was asked his/her main destination (or place furthest from home) on each trip. This approach, although simplest, does not enable an accurate measurement of the actual number of people visiting each region. For example, a visitor might give Ottawa as his main destination when, en route, he also stayed overnight in Metro Toronto and Belleville. Thus, in order to estimate the number of visitors to each region more accurately, respondents were also asked to name every place where they had stayed overnight.

B. EXPENDITURE TYPES

1. Automobile

Expenditure on gas/oil/maintenance during trip or prior (when part of prepaid package), and also pertains to trucks, campers and other recrea- tional vehicles such as boats, snowmobiles, etc. Included also are rental costs for autos or other motor vehicles.

2. Public Transportation

Expenditure on fares paid to Canadian carriers only, either during trip or prior (when part of prepaid package), for any destination.

3. Accommodation

Expenditure made in regards to commercial accommodation rooms/units, either during or prior (when part of prepaid package).

4. Food/Beverage

Expenditure on food either during trip or prior (when part of prepaid package), and on beverages, and includes food and/or beverage portion of accommodation bill.

5. **Recreation**

Expenditure made either during trip or prior (when part of prepaid package) on user fees, admissions and rental fees, and pertains to such items as recreational facilities, sporting events, amusement parks, attractions, night clubs, theatres, cultural activities, fish and game licences, rental of boats, snowmobiles, equipment etc.

6. **Local Transportation**

Expenditure on transportation within the local area of any of the places stopped at during the trip. Such expenses include taxi, bus, subway, etc.

7. **Other**

Expenditure on all other items, such as clothing, art, appliances, furnishings, souvenirs and other miscellaneous purchases made during the trip.

SECTION C: ACTIVITY CATEGORIES

1. Engaged in Outdoor/Sporting Activity

Went golfing, swimming, hiking, taking walks, etc.

2. Engaged in Sightseeing/Touring

Travelling on "scenic routes", to see special views, along back roads, just going for a ride, etc.

3. Engaged in Personal Business

Visited doctor, lawyer, dentist, banking, attended funeral, wedding, etc.

4. Engaged in Business/Conventions

Bought, sold, inspected, consulted, visited associates, serviced customers (do not include sales route activities), attended conferences, group meetings, training courses, seminars (at least 10 people), etc.

5. Went Shopping

Included shopping for food, furniture, etc. One need not have purchased anything. Window shopping or browsing was considered shopping also.

6. **Went to a Restaurant to Eat**

7. **Went on Boat/Rail Tours**

8. **Went to Historical Sites**

Parliament buildings, forts, etc.

9. **Attended Sporting Events**

Golf tournament, professional ball game, etc.

10. **Attended Museums/Galleries**

11. **Attended Exhibitions/Fairs/Special Events**

Flower shows, carnivals, etc.

12. **Attended Attractions/Zoo/Amusement Parks**

CN Tower, Botanical Gardens, etc.

13. **Attended Live Theater/Dance/Music Concerts**

Does not include movies in this category.

14. Visited With Friends/Relatives

15. Other Activities

Any other activities were included here.

SECTION D: ACCOMMODATION CATEGORIES

1. Stay with Friends/Relatives

Staying overnight with friends or relatives eitner at their home or cottage.

2. Hotels/Motor Hotels

Included commercial establishments where one enters one's room from a central hallway. Tourist Homes were also included.

3. Motels

Commercial establishments where one enters one's room directly from outside the establishment.

4. Resort Lodges

Commercial establishments outside large urban areas which provide centralized eating facilities and recreation within the grounds.

5. Commercial Cottages/Cabins

Commercial establishments with most units arranged eitner singly or in pairs under one roof. No centralized eating facilities or recreation facilities are offered.

6. Private Cottage (For Own Use), Camp, Chalet, Condominium

Owned, rented or borrowed for one's own use.

7. Camping/Trailer Parks

Establishments providing for public use: sites for tents, tent trailers, etc. Residential trailer parks are not included.

8. Outfitter/Outpost

Commercial establishments which cater to hunting and/or fishing in surrounding locations.

9. Marina/Unorganized Anchorage

Mooring or docking facilities with or without related services.

_____

-c) To what degree did seeing or hearing that advertising... (READ EACH STATEMENT AND CHECK ANSWER WHICH APPLIES.)

	To A Large Degree	To A Small Degree	Not At All
• Prompt you to find out more about Ontario?	[ ]	[ ]	[ ]
• Influence your decision to travel to Ontario?	[ ]	[ ]	[ ]
• Help you decide which places or attractions to visit?	[ ] 1	[ ] 2	[ ] 3

EVERYONE.

17-a) Had you, or any household members with you, visited Ontario before this trip?

Yes [ ] No [ ] CHECK HERE, SKIP TO Q.18.

-b) In what year was that last visit?

1985	[ ]	2	1981	[ ]	6
1984	[ ]	3	1980	[ ]	7
1983	[ ]	4	1979	[ ]	8
1982	[ ]	5	1978 or earlier	[ ]	9

Now, a few questions to help describe the people we have asked to fill out this questionnaire.

18. Could you please check your age and highest education attained. Then, if there are other persons in your household travel party please describe each of the other people age 15 and over, starting with the oldest first.

	All Adults Age 15+						
	Self	Others: Oldest	Others: Next Oldest	Next Oldest	Next Oldest	Next Oldest	
Sex							
Male	[ ]	[ ]	[ ]	[ ]	[ ]	[ ]	1
Female	[ ]	[ ]	[ ]	[ ]	[ ]	[ ]	2
Age							
15 to 19 years	[ ]	[ ]	[ ]	[ ]	[ ]	[ ]	1
20 to 24 years	[ ]	[ ]	[ ]	[ ]	[ ]	[ ]	2
25 to 34 years	[ ]	[ ]	[ ]	[ ]	[ ]	[ ]	3
35 to 44 years	[ ]	[ ]	[ ]	[ ]	[ ]	[ ]	4
45 to 54 years	[ ]	[ ]	[ ]	[ ]	[ ]	[ ]	5
55 to 64 years	[ ]	[ ]	[ ]	[ ]	[ ]	[ ]	6
65 years and over	[ ]	[ ]	[ ]	[ ]	[ ]	[ ]	7
Highest Education Attained

High school	[ ]	[ ]	[ ]	[ ]	[ ]	[ ]	2
Post-high school (non-university)	[ ]	[ ]	[ ]	[ ]	[ ]	[ ]	3
University	[ ]	[ ]	[ ]	[ ]	[ ]	[ ]	4
OTHER (PLEASE SPECIFY)	_____	_____	_____	_____	_____	_____	

19. What is the occupation of the chief wage earner in your household? I don't mean the name of the company, but just the type of job and type of company.

_____ in _____
(TYPE OF JOB) (TYPE OF COMPANY)

IF RETIRED, CHECK HERE ... [ ] ... AND ANSWER: What was his/her occupation before he/she retired?

_____ in _____
(TYPE OF JOB) (TYPE OF COMPANY)

20. Could you please check the total income of your household before taxes in 1984.

Less than $12,000	[ ]	1	Is this amount in...
$12,000 to $17,999	[ ]	2	Canadian $ [ ]
$18,000 to $23,999	[ ]	3	American $ [ ]
$24,000 to $29,999	[ ]	4	Other currency? [ ]
$30,000 to $39,999	[ ]	5	(If other please enter currency
$40,000 to $49,999	[ ]	6	and amount below)
$50,000 to $59,999	[ ]	7	_____ _____
$60,000 or over	[ ]	8	(CURRENCY) (AMOUNT)

21. In total, how many people contributed to that income in 1984?

1 [ ] 2 [ ] 3 [ ] 4 or more [ ] individual(s)

22. What comments would you like to make, either positive or negative, about your stay in Ontario?

_____

_____

_____

Thank you for your help. Please accept the enclosed "Yours To Discover" bumper sticker as a token of our appreciation.

At some point in the future we may want to contact some of the people surveyed for additional information. May we contact you if necessary?

Yes [ ] No [ ]

What is your...

Name: _____

No./Street: _____ Apt.: _____

Town/City: _____ Province/State/Country: _____

Postal/Zip Code: _____ Phone: _____

Once again, thank you very much for your help.

APPENDIX VI
CONFIDENCE INTERVALS

Confidence Intervals

The following two tables (Table A and Table B) outline the confidence intervals for a range of projections of person trips. These confidence intervals are the intervals within which the true or population value underlying the projection may be expected to fall with a 95 percent probability.

Throughout the summary tables found in this report, results are basically given in two forms: in actual person trips or as a percentage.

Table A is designed to give the confidence interval in person trips for an observed result which is stated in terms of person trips. Table B is designed to give the confidence interval as a percentage for an observed result which is stated in terms of a percentage.

Thus the confidence interval will be indicated in two ways:

Table A: the projected number of person trips plus or minus a certain number of person trips.

i.e., 5,000 person trips $\pm$ 200 person trips which is 4,800 to 5,200 person trips

Table B: the percentage observed plus or minus a certain percentage.

i.e., 75 percent $\pm$ 5 percent
which is 70 percent to 80 percent

These intervals should be read as follows: "The true value for the population as a whole will fall within the range specified, from the projection/percentage minus the number, to the projection/percentage plus the number, with a 95 percent probability."

To read Table A:

1) Look for the base (in person trips) on the summary table.

2) On Table A, find this number (or the one closest to it) in the column headed "Base: Person Trips".

3) If you wish to know the confidence interval for the base of the summary table, read across to the figure in the column headed "100%". For example, look at "Table 1: Total Visitors" of this report under the column titled "Person Trips". Notice that the base for this table is 25,142 person trips. To determine the confidence interval in person trips for this figure look down the column in Table A titled "Base: Person-Trips ('000)" for the closest figure. In this case it is 25,000. Since the 25,142 figure in Table 1 is the base for that entire column, look across on Table A to the column marked "100%". This is the margin of error for the 25,142 figure. The margin of error is 1,500 person trips, therefore the confidence interval is 23,642 (25,142 - 1,500) to 26,642 (25,142 + 1,500). This should be read as "there is a 95 percent probability that the true answer falls between 23,642 person trips and 26,642 person trips" (remember these figures are in thousands as well).

4) If you wish to know the confidence interval for any other projection on the summary table, determine the proportion of this projection to the base, and then read across to the figure in the appropriate column. For example, again from "Table 1: Total Visitors" of this report, under the column headed "Person Trips", the figure for the first quarter is 3,823 person trips. To determine the confidence interval in person trips for this figure it is first necessary to determine its proportion of the base figure of 25,142 person trips. Since the proportion is 15.2 percent, look down the column in Table A closest to this figure. In this case, 15 percent is right between the 10% and 20% columns, so it is better to be conservative and round upwards to 20% to have a larger margin of error.

The original figure of 3,823 person trips is closest to the 4,000 figure found in the "Base" column of Table A. Where the "4,000 Person Trips" row and the "20%" column meet is the margin of error of 165 person trips. Therefore, the confidence interval is 3,658 (3,823 - 165) to 3,988 (3,823 + 165). This should be read as "there is a 95 percent probability that the true answer falls between 3,658 person trips and 3,988 person trips.

To read Table B:

1) Look for the base (in person trips) on the summary table.

2) On Table B, find this number (or the one closest to it) in the column headed "Base: Person Trips".

3) To determine the confidence interval for any percentage on the summary table, read across to the figure in the column headed by a percentage which is closest to the one from the summary table. For example, again from "Table 1: Total Visitors" of this report under the column titled "Person Trips", the figure for the first quarter is 15.2 percent. To determine the confidence interval for this figure, look for the base upon which the percentage was calculated (in this case, 25,142 person trips). Look for the closest number to this in the column "Base: Person Trips ('000) in Table B (in this case, 25,000). Read across the row to the column headed by a percentage closest to 15.2 percent. Here it is right between the "20%" and "10%" columns so it will be best to use the "20%" column since it is more conservative in its estimate of the margin of error. The margin of error is 2.0 percent; therefore, the confidence interval for the 15.2 percent figure in Table 1 is 13.2 percent (15.2% - 2.0%) to 17.2 percent (15.2% + 2.0%). This should be read as "there is a 95 percent probability that the true answer falls between 13.2 percent and 17.2 percent".

Table A

CONFIDENCE INTERVALS

(Margin of error for observed projections in person trips, at the 95 percent probability level)

	Proportion of Base: Person Trips ('000)											
Base: Person Trips ('000)	100%	90%	80%	70%	60%	50%	40%	30%	20%	10%	5%	1%
